# Differential Dynamical Systems - Revised Edition (1st Printing) 

J.D. Meiss

May 7, 2020

Errors are listed by page and line number. The symbol $\Longrightarrow$ means "replace with". A negative line number means count from the bottom of the page. Each equation line is counted as one line and footnotes are not counted

The first printing (Jan 2017) of the revised edition has 10987654321 on the copyright page.

| 4 | 104 | 9 | $\mathbb{S}^{1} \rightarrow \mathbb{R}^{n} \Longrightarrow \mathbb{S}^{1} \rightarrow M$ |  |
|  | 105 | 17 | $x_{1}=u\left(s, x_{o}\right) \Longrightarrow x_{1}=u\left(s ; x_{o}\right)$ |  |
|  | 117 | -9 | since $\alpha-K \varepsilon<0 \Longrightarrow$ since $\alpha-K \varepsilon>0$ |  |
|  | 118 | -3 | a $\delta<\epsilon$ such that $L(x) \leq m \Longrightarrow$ a $\delta<\epsilon$ such that $L(x)<m$ | MS |
|  | 118 | -1 | beyond the $\Longrightarrow$ to the | MS |
|  | 121 | 5 | (see Exercise 4.23) $\Longrightarrow$ (see Exercise 8) |  |
|  | 127 | 15 | is, there is a surjective map $\tau: A \times \mathbb{R} \rightarrow \mathbb{R}$ that is monotone $\Longrightarrow$ is, for each $x \in A$, the map $\tau(x, \cdot): \mathbb{R} \rightarrow \mathbb{R}$ is surjective and monotone | USF |
|  | 128 | 3 | correspondence, and if and only if the $\Longrightarrow$ correspondence, and the | USF |
|  | 133 | 2 | we begin with an ODE $\Longrightarrow$ we begin by taking $x^{*}=0$ and with an ODE | USF |
|  | 133 | 15 | Suppose first that $H$ is a $\Longrightarrow$ Suppose first that $h=H_{1}$ is a | USF |
|  | 136 | 5-6 | extra line feed after "does not" |  |
|  | 137 | 12 | Theorem $4.6 \Longrightarrow$ Theorem 4.19 |  |
|  | 141 | 9 | $(-1,0) \Longrightarrow(1,0)$ |  |
|  | 154 | -9 | $\rightarrow \mathbb{S} \times R \Longrightarrow \rightarrow \mathbb{S} \times \mathbb{R}$ | USF |
| 5 | 183 | -3 | sink at $(-\lambda, \lambda) . \Longrightarrow \operatorname{sink}$ at $(-\lambda,-\lambda)$. |  |
| 6 | 221 | 2 | in (6.42): $=\cos (\theta) \Longrightarrow=\sin (\theta)$ | GD |
|  | 221 | 6 | $\cos ^{m}(\theta) \Longrightarrow \cot ^{m}(\theta)$ | GD |
|  | 225 | -4 | $( \pm 1 / \sqrt{3}, \pm 2 / \sqrt{3}) \Longrightarrow( \pm 1 / \sqrt{3}, \pm \sqrt{2 / 3})$ | GD |
| 8 | 270 | -8 | the map $\nu=p(\mu)=m(\mu) c(\mu) \Longrightarrow$ the map $\nu=p(\mu)=\frac{1}{2} m(\mu) c(\mu)$ |  |
|  | 288 | 12 | "and stable if $\operatorname{Re}(\lambda)>0$ and" $\Longrightarrow$ and, in the two-dimensional center subspace, is stable if $\operatorname{Re}(\lambda)>0$ and |  |
|  | 289 | Fig 8.12 | Caption should say "top" and "bottom" instead of left and right | USF |
|  | 304 | 5 | $\gamma_{o} \subset \Longrightarrow \eta_{o} \subset$ |  |
|  | 304 | 7 | $z \in \gamma_{o} \Longrightarrow z \in \eta_{o}$ |  |
|  | 304 | 13 | For any $q \in \Gamma_{o} \Longrightarrow$ For any $q \in \eta_{o}$ |  |
|  | 305 | 11 | $=\varphi_{t}(q, \theta)+\varepsilon \Longrightarrow=\varphi_{t}(q)+\varepsilon$ |  |
|  | 306 | 14 (8.87) | $\frac{d}{d \varepsilon}\left(f\left(\psi_{t}\left(s_{\varepsilon}(\theta), \theta\right)\right) \Longrightarrow \frac{d}{d \varepsilon}\left(f\left(\psi_{t}\left(s_{\varepsilon}(\theta)\right)\right)\right.\right.$ |  |
|  | 314 | $17$ | "ways of putting $n$ identical balls into $m$ boxes" $\Longrightarrow$ ways of choosing $n$ objects from a set of $m$ objects. |  |
|  | 315 | 8 | "Verify that this system has the form (8.40) and satisfies" $\Longrightarrow$ "Verify that when $\lambda=0$, this system can be transformed to the form (8.40). Then show it satisfies" |  |
| 9 | 330 | 22 | We will show that action $\Longrightarrow$ We will show that the action | USF |
