

Dynamical Systems Tetrahedron

- Faculty: James H. Curry, Robert W. Easton, Keith Julien, James D. Meiss
- Postdocs: Panos Panayotaros, Gareth Roberts, Michael Sprague
- Grad Students: Neil Burrell, Adriana Gomez, Paul Mullooney, Roberto Munoz-Alicea, Matthew Tearle, Vanessa Robins, Srinath Vadlamani, Derin Wysham
- Undergraduates: Alicia Allen, Lauren Anderson, Moorea Brega, Alex Brinkman, Alejandro Cantarero, Michael Franklin, Geoff Goehle, Kristine Henderson, Deborah Hinck, Jeremy Horgan-Kobelski, Philip Kent, Corry Lee, Holly Lewis, Sarah Macumber, Matthew Martin, Ashley Moore, Karl Obermeyer, Kenzie Parton, Tye Rattenbury, Jocelyn Renner, Hilary Snyder, Mark Snyder, Dominic Thurmer, Joshua Wells, Stefan Wild, Mark Winter

Papers Published

- C. Bodelon, R.L. Devaney, L. Goldberg, M. Hayes, J. Hubbard and G. Roberts, "Hairs for the Complex Exponential Family," *Intl. J. of Bifurcation and Chaos* 9, No. 8, 1517-1534, (1999).

- R. B. Corotis, A. M. Dougherty, "Determining Reliable Design Loads for Natural Phenomena", accepted for publication in Natural Hazards Review, ASCE, 2003.

S. Vadlamani, "The Particle-Continuum Method: an Algorithmic Unification of Particle-In-Cell and Vlasov Methods", Invited talk at the 18th International Conference on Numerical Simulation on Plasmas (ICNSP '03), 12 page paper for proceedings, 20-30 page paper to Journal of Computational Physics.

M. Snyder, "Stochastic Aspects of Dynamics: Benford's Law", MS Thesis (University Microfilms, May 2001), advisors: J. Curry and A. Dougherty.

Papers In Progress

H.R. Dullin and J.D. Meiss, "Twistless Bifurcations for Symplectic maps," in progress.

H.E. Lomeli and J.D. Meiss, "Orbits Heteroclinic to Invariant Circles in Three Dimensional Maps," in progress.

A. Gomez and J.D. Meiss, "Dynamics of Rational Maps of \mathbb{R}^3 with an Integral," in progress.

H. Dullin, J.D. Meiss, D. Sterling, "Codes for Rotational Orbits in the Hénon Map," in progress (2003).

P. Mullaney, K. Julian and J.D. Meiss, "Blinking rolls: chaotic advection in a 3D flow with an Invariant," in progress (2003)

D. Wysham and J.D. Meiss, "Iterative Methods for Numerical Computation of the Stable Manifolds of Tori," in progress (2003).

D. Wysham and J. Meiss, "Numerical Computation of the Stable and Unstable manifolds of Invariant Tori", in progress.

G. Roberts, "Interesting Families of Central Configurations in the Planar N-Body Problem," in progress.

M. Brega, A. Canterero, M. Franklin, S. Macumber, and J. Curry, article on PDE Methods in Image Processing in progress.

K. Julien, E. Knobloch and S. M. Tobias, "Reduced PDE's for Anelastic Magnetoconvection and Single-Mode Studies" in progress.

K. Julien and J. Werne, "Penetrative Convection in the Solar-Interior: Numerical Studies of Perfectly Absorbing Layers for Gravity Waves" in progress.

K. Julien and E. Knobloch, "Fully Nonlinear Anelastic Rotating Convection. Single-mode Studies" in progress.

K. Julien and J. Werne, "Direct Numerical Simulations of MHD Instabilities in the Solar Tachocline" in progress.

K. Julien, E. Knobloch, and J. Werne, "Direct Numerical Simulations of the Reduced Des for Rapidly Rotating Convection" in progress

K. Julien, E. Knobloch, and S. M. Tobias, "Direct Numerical Simulations of Magnetoconvection in the Presence of an Oblique Field" in progress.

K. Julien, N. Burell, and J. Weiss, "Elliptic Moment Models for Quasigeostrophic Vortices: Merger and Alignment" in progress.
